SUMMARY

Second-year first semester Computer Science student at Universiti Teknologi PETRONAS (UTP) with a CGPA of 3.95, specialising in AI/ML engineering and deep learning. Hands-on Python experience spans LLM and RAG pipelines, computer vision, and VR applications across multiple academic and competition projects. Proven team leadership from leading teams of up to six members to competition wins, paired with strong cross-cultural communication from university leadership roles. Available for internship placement from May to December 2027.

EDUCATION

Universiti Teknologi PETRONAS (UTP)

September 2025 – December 2028

Bachelor of Computer Science (Current CGPA: 3.95)

PETRONAS Education Sponsorship Programme (PESP) Scholar

Universiti Teknologi PETRONAS (UTP)

September 2024 – August 2025

Foundation in Computer Science

Foundation 4.0 Excellence Award

TECHNICAL SKILLS

AI / ML: Machine Learning, Deep Learning, OpenCV, NLP, RAG, YOLO11, ResNet18, FAISS, Vector Search, Sentence Transformers, LangChain, Ollama, GROQ API, Amazon Bedrock, Microsoft Azure AI

Cloud & Backend: FastAPI, REST API, PostgreSQL, Oracle SQL, DBMS, SQL Database Design, Git

Dev Tools: Python, C++, C#, Visual Basic, HTML, CSS, Javascript, TypeScript, React, Streamlit, Unity, Vercel, Kiro, Oracle SQL Developer, Draw.io, Google Colab, Jupyter Notebook

Languages: English (C1: Oxford OOPT) · Mandarin (Native) · Malay (Professional) · Cantonese (Working) · French (A1)

TECHNICAL PROJECTS

NEXA: AI-Assisted Tariff Calculation Automation | Jabil IT ECP Bootcamp 3.0

June 2026

Python · FastAPI · LangChain · Ollama · RAG · Supabase (PostgreSQL) · REST API · pandas · Matplotlib

- Engineered an end-to-end AI tariff classification pipeline using retrieval-augmented generation with nomic-embed-text embeddings and the qwen2.5:1.5b language model, cutting batch-processing time by 98 percent, from 12.5 hours to about 15 minutes, and manual review steps by 75 percent, while auto-approving HS codes at 95 percent confidence or higher.
- Built a role-based LangChain analytics chatbot evaluating all 17 Malaysian free trade agreements for optimal duty rates, reducing estimated error exposure by \$2,000 to \$2,500 per batch, and added a circuit-breaker layer against Ollama failures and prompt-injection attacks.
- Achieved 88 to 95 percent accuracy on 10-digit HTS code classification in a hybrid AI-human workflow, compared with 80 to 92 percent for manual classification alone.

CulturaVerse: AI-Powered VR Literature Learning Platform | CICSC 2026

Feb – May 2026

Unity · GROQ Cloud API · Ollama LLM · Google Cloud STT/TTS · NLP · WebGL

- Served as Project Leader for a six-member team, Lumenix, directing a cross-platform VR, PC, and mobile app that enables real-time AI voice conversations with literary characters through the GROQ Cloud API.
- Delivered 2 interactive AI character scenes with real-time 6-class emotion detection driving an adaptive VR environment, backed by an Ollama fallback and Google Cloud speech services; user testing confirmed the emotion-adaptive triggers worked correctly.

PawSecure: AI Stray Animal Rescue Platform | KitaHack 2026

May 2026

Python · FastAPI · YOLO11 · ResNet18 · TypeScript · Supabase (PostgreSQL) · REST API · OpenStreetMap

- Fine-tuned a YOLO11 nano model on 4,168 labelled images over 50 training epochs for real-time CCTV-based stray animal detection and built a ResNet18-based 512-dimension embedding system for re-identification via vector similarity search.
- Built a complete NGO rescue workflow from report submission through live map tracking to claim confirmation, with OpenCV HSV-based four-tier injury classification and a JWT-secured Supabase PostgreSQL backend across 5 REST API endpoints.

Malaysian Dialect Translation RAG System

April 2026

Python · Streamlit · FAISS · Sentence Transformers · Vector Search · Scikit-learn

- Developed a hybrid RAG system translating three Malaysian dialects, Kelantan, Sabah, and Sarawak, into Standard Malay by combining phrase-aware lookup across a 148-term dictionary with FAISS vector search using Sentence Transformers embeddings.
- Engineered noisy-text normalisation and confidence-governed rejection of uncertain translations and built benchmarking workflows evaluating retrieval performance across a 30-sentence test set spanning all 3 dialects.

Scandal Couture Database Management System

May – Jul 2026

Oracle 21c XE · SQL*Plus / SQL Developer · Draw.io

- Designed and implemented a 94-table Oracle SQL relational database for Scandal Couture, a fictional retail boutique, modelling the schema in Draw.io with 29 entity tables and 65 bridge tables for many-to-many relationships.
- Authored multi-table join queries spanning up to 8 tables and view statements to answer real business scenarios across sales, loyalty, procurement, and inventory, resolving Oracle integrity-constraint errors along the way.

SOFT SKILLS / POSITIONS

Logistics Head of Department, MPU 4.0, UTP

2026 – Present

Direct logistics planning and cross-team coordination for MPU 4.0 departmental activities, overseeing scheduling and resource allocation across department-wide events.

Team Lead, CICSC 2026, China University of Petroleum, China | United Arab Emirates (remote)

Mar – Jun 2026

Led a six-member team representing UTP through to the Middle East Regional Final of the China International College Students' Innovation Competition, coordinating research, prototype development, and pitch delivery for the CulturaVerse project.

Team Leader, OH MY CODE 16.0 Group 13, UTP

Jul 2025

Directed team planning, task delegation, and technical execution for a VB.NET and Microsoft Access system solution, coordinating collaboration under competition time constraints and achieving an excellent project score of 14.63 out of 15.

Head of Facilitators Department, Down To Earth Project 2024, UTP

Sep – Nov 2024

Directed a team of facilitators delivering a community outreach programme at SJK(C) Chung Sun, Seri Iskandar, designing interactive activities that introduced the United Nations Sustainable Development Goals (SDGs) to primary school students.

Emcee, PETRONAS SECURE NEX Hackathon 2025, UTP SYNTECH

Aug 2025

Hosted the Opening Ceremony, Closing Ceremony, and Pitching Sessions, ensuring clear communication and smooth transitions between teams, judges, and organisers.

Engagement Committee, RISE Social Practice Programme 2025

Jan 2025

Coordinated community-focused social initiatives with Tsing Hua University, China, contributing to CSR activity planning and facilitating engagement sessions between student delegates.

Volunteer Committee, CSR Orphanage Programme, The Salvation Army

Feb 2025

Led interactive activities and games for children in a CSR programme with The Salvation Army, Ipoh, collaborating with ASEAN student delegates from Vietnam, the Philippines, Indonesia, Myanmar, and Cambodia.

Adjudication Committee, 10th Northern Malaysia Mandarin Debate Tournament

Dec 2024 – May 2025

Supported the adjudication process for the tournament, coordinating judging workflows and evaluation materials to ensure fairness and consistent scoring across sessions.

AWARDS & CERTIFICATIONS

Awards

Champion: Jabil IT ECP Bootcamp 3.0, AI & Data Innovation, Jabil Circuit

June 2026

Silver Award: AWS × UTP GenAI Hackathon, built AWS-IQ, a multi-agent AI onboarding system on Amazon Bedrock

June 2026

Bronze Award: China International College Students' Innovation Competition (CICSC 2026), Middle East Regional Final

May 2026

Certifications

Microsoft Azure AI Fundamentals · Supervised Machine Learning (Stanford University / Coursera) · Introduction to Generative AI (Google Cloud) · Creating Image Captioning Models (Google Cloud) · Introduction to Robotics (AWS)
